Great, sounds like the 15 day review date works...just let me know when it is completed.

Thanks!

It sounds like the Division program is in error. Minor exploration is 15 days review.

Hello Steve,

The IR Review Date is automatically generated on the CTS when a task is entered for a minor exploration. Also, the last several explorations 2944, 3012, 3024 & 3037 did go thru the IR process.

The IR Review Date is 15 days out from receipt of the application. I would like to be consistent in how these are handled.

Please let me know if there is no review date for explorations.

Thanks!
Suzanne
