Kevin,

We have a national database system that keeps track of this type of information. I asked Edith to go back ten years and check to see if any NOV's were issued. None had been. They had a violation for total iron in January and July of 2010 at outfall 002. They also had a violation for TSS in May of 2010 at 001. I believe these are sporadic and we would not proceed to enforcement on these violations. Of course this does not preclude DOGM or any other State agency doing what is appropriate based on their regulations. Thanks for the call and let me know if I can be of help for any other coal mine.

Hello Mike,

I looked at PCS and ICIS and wasn't able to find any Enforcements on Deer Creek Mine. Thanks
