2. Signs and Markers

The mine identification sign is posted along side of the county access road leading into the permit area of the mine site. The sign is in good shape and contains all of the information required by regulation.

4.a Hydrologic Balance: Diversions

The facilities used for mine water discharge and mine water re-circulation for fire protection were observed during the inspection. These facilities are contained inside of buildings and were found to be in good repair and functional.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment pond was checked as part of the inspection and found to be functioning properly.

8. Noncoal Waste

The mine site was free of noncoal waste items during the inspection. The mine has an amendment submitted to the Division to construct a new noncoal waste storage facility.
