LOCATION: Plaza II - 2
SUBJECT: Utah Power & Light Company
Division of Oil, Gas & Mining
Drawing Size Requirement

DATE: 8/21/78
TIME: 11:00 am
CONTRACT OR W.O. NO.: 1155-00

DISTRIBUTION: W.T. Mooney
J. Mueller
D.M. Miller
P. Fernon
J. Baughman
K. Gurr

ACT 1015/108

I called Mr. Daniels, a Mine Land Coordinator, to discuss the drawing size requirements of the Utah Division of Oil, Gas & Mining, the agency designated to enforcement of Office of Surface Mining regulations. He said that no standardization was established at this time. I explained that M-K has two drawing sizes, 24" x 36" for plan and profiles and 30" x 42" for all other work. He said these would be acceptable and that the drawings would be forwarded to other state agencies by the Division of Oil, Gas & Mining after review by that agency. Since direct submittal to those agencies is not required, the drawing size requirements of other agencies will not apply.

Mr. Daniels said that three sets of prints would be required for the submittal.
