Re: Utah Power & Light Mining Permit Modification, Wilberg Coal Mine,
Cottonwood Portal Site, Emery County, Utah

Dear Mr. Smith:

This office has completed its review of those documents received in this office October 7, 1980, related to the above mentioned project.

The text indicates that existing ponding facilities will be utilized to contain the runoff. An examination of our files did not reveal any previous approval for a structure. I would request that this office be supplied with a description of the existing pond and its location.

As requested I am returning the project documents.

Sincerely,

Robert L. Morgan
Directing Dam Safety Engineer
