Re: Cottonwood Lease Modification

Dear Ms. Boucek:

The following information is supplied in response to your letter of June 22 requesting additional information concerning the application for inclusion of the Cottonwood lease to the Wilberg Mining and Reclamation Plan.

UMC 783.25 - Cross Sections, Maps and Plans

The enclosed certification should be adequate for maps and plans included in the permit application.

UMC 784.13 - Reclamation Plan: General Requirements

Reclamation of the ventilation breakout will require two crew days labor. Material and labor costs will be \$2,000.

All revegetation will be done with DOGM concurrence.

UMC 784.20 - Subsidence Control Plan

As in all mining sections in the mine plan area of the Wilberg Mine, subsidence monitoring stations will be established prior to retreat mining and will be included in the annual Subsidence Monitoring Report.

Hydrology

1. "Significant" springs and seeps are those which show measurable quantities of water.

DIVISION OF
OIL, GAS & MINING

Ms. Mary M. Boucek
July 7, 1983
Page 2

2. Spring Map CE-10404-EM supercedes maps CE-10009-EM and CE-10228-EM.
3. Any water encountered during mining will be collected and redistributed for use in the mining operations. Excess quantities would be discharged into the left fork of Grimes Wash in accordance with stipulations of NPDES Discharge Permit UT-0022896.

Applicant contends that information submitted for the ventilation breakout is complete and requests approval without conditions. The exact location is shown on the submitted mine plans. Timing is contingent upon your approval of the application.

Should you require additional information, please advise.

Yours truly,

C. E. Shingleton
Director of Services
Mining and Exploration
