Memo to File:

RE: Waste Rock Disposal Site
Utah Power & Light Company
Wilberg Mine
ACT/015/018B
Emery County, Utah

I spoke with Laurelle Hughes & Mervin Miles of Price, BIM concerning revegetation of Site #1 as well as of entire area. I requested:

1. Row agreements/amendment copies
2. BIM requirements or recommendations on
 - temporary revegetation
 - permanent revegetation
3. BIM seedmix recommended for the immediate (Fall '83) reclamation of Site #1; it was pointed out to BIM that the 7 lbs/acre grass/shrub mix proposed by UP&L on May 4th '83 was felt to be unacceptable by the Division as well as OSM. I suggested increasing rates and adding a N-fixing legume.

BIM will respond in writing, for our records & OSM's, to the above, sometime next week. They feel the area (entire area, sites 1-8) should be temporarily reclaimed until the entire disposal project is complete and then reclaim the whole thing at once. If we have this in our records, I believe we can accomodate their desires; however, we do need the documentation.

MARY BOUCEK
RECLAMATION BIOLOGIST
