Re: Special Conditions - Wilberg Mine Permit

Dear Mr. Hamm:

In reply to your request dated October 24, 1984, the following additional information is submitted:

1. Drawing No. CM-10500-WB has been modified to show the number of filter blankets required as well as gradation information. Typical drop structure details for the main surface runoff channel have been added to Drawing No. CM-10378-WB, Sheet 2. In addition, nine pages of calculations are included for insertion in Appendix XV.
2. Page 4-48 of the text is revised to include mitigation measures for subsidence impacts.
3. The Deer Creek application land use map (packet 2-18) was revised to reflect the Forest Service requests and was submitted to you on October 12, 1984. It is identical to the Wilberg land use map.
4. Special condition 7d has been added to page 4-48.

Very truly yours,

C. E. Shingleton
Director of Permitting,
Compliance & Services
Mining and Exploration
