Regarding: Des-Bee - Wilberg Disposal Site #1 and #2 Inspection

Dear Mr. Smith:

This report is submitted as required by UMC 817.71. This report consists of the 1st, 2nd and 3rd quarterly reports. Due to an oversight the 1st and 2nd quarterly reports have not been submitted.

Site #1 was reclaimed in the fall of 1983. No sink holes or other detrimental features have occurred in the reclaimed surface.

Site #2 has been filled and is ready to be leveled and graded to final contour. Then the soil cover will be placed and seeded.

No structural problems exist with either site. The surface drainage is in tact as designed and built.

Sincerely,

*Larry Guymon*
