Re: Wilberg Mine Pond Lining

Dear Mr. Guymon:

We have reviewed the information submitted August 17, 1984 on the Wilberg Mine sediment pond lining. Drawing WS715C and descriptive material were reviewed.

As a result of our review the August 9, 1979 construction permit is modified to include the use of a filter fabric liner in addition to a bentonite treated layer.

At this time we also give approval for a 30 day by-pass of the sediment ponds during installation of the fabric liner. The storm runoff during this time is to run through a sediment trap and straw bales prior to discharge.

Sincerely,

UTAH WATER POLLUTION CONTROL COMMITTEE

Calvin K. Sudweeks  
Executive Secretary
