Salt Lake City, Utah 84180-1203

ATTN: Ms. Sandy Pruitt

Dear Ms. Pruitt,

As required by UMC 817.131, this letter is notification of the temporary cessation of mining operations at the Deer Creek and Des-Bee-Dove Coal Mines in Emery County. These closures are caused by the fire at the Wilberg Mine and will be in effect thru December 31, 1984.

The Wilberg Mine will, of course, be closed for a longer term. We will advise you when mining is resumed.

Yours truly,

C.E. Shingleton
Director of Permitting,
Compliance and Services

Dear Ms. Wright;

On February 26, 1985, U.S. Fuel Company was served NOV. N85-6-2-1 relating to the South Fork truck loadout exit road. We wish to provide our point of view regarding this violation for your consideration in assessment of penalty points.

This violation was issued because runoff from snow melt was flowing down the exit road and bypassing sediment control structures. Our comments are as follows:

1. Snow had been plowed from the exit road except for a narrow strip (2 to 3 feet wide) on the west edge. Runoff resulted from snow melt originating from this narrow strip.
2. Plans for the installation of a slotted cross drain at this site were submitted to the Division on November 6, 1984. The plans were approved and an extension of time in which to construct the slot drain was granted by the Division (December 28, 1984) until June 15, 1985.
3. Remedial action, including removal of the strip of snow and construction of a small ditch on the west edge of the exit road, was completed the day following the violation (February 27). An abatement time of one week was allowed in the NOV. The violation was terminated by the inspector on March 1, 1985.
4. Prior to the date of the NOV, no trucks were loaded at the facility since September 1984, therefore, effects of snow melt up to this time should have been negligible.

Mary Ann Wright
