RE: Emergency Access Road to the 4E Belt Portal, Cottonwood Mine, Utah Power & Light Company, ACT/015/019, Folder #7, Emery County, Utah

Dear Mr. Guymon:

This letter is intended to remind you of an agreement we made in June 1985 that Emery Mining Corporation (EMC) will complete reclamation of the emergency access road to the 4E Belt Portal by November 15, 1985. By that time, it was expected that the emergency 4E portal development was to be complete and contemporaneous reclamation of the road could then be completed this fall, in a timely manner, as required by UMC 817.100, 817.166, and 817.176. During my last inspection, September 12, 1985, you mentioned that EMC may decide to retain the road for future access. I pointed out at that time that the emergency access does not meet the design standards of UMC 817.160-.176. If the road is to be retained, it must be permitted, and it must meet these design specifications.

Please respond to this letter with a report on EMC's intentions. If the road will not be reclaimed by November 15, 1985, plans to upgrade the road in order to meet the required design standards must be submitted to DOGM before that date. DOGM approval of the road design is required for continued use of the road.

If you have any questions on the permitting requirements, please contact John Whitehead. Please do not hesitate to contact Joe Helfrich or Bart Kale if compliance cannot be achieved (with good justification) within the time frame that we agreed upon.

Sincerely,

A handwritten signature in black ink, appearing to read 'Sandy Pruitt'.
