Re: Crane Pad - Wilberg/Cottonwood Mine,  
ACT/015/019, Emery County, Utah

Dear Mr. Braxton:

The temporary crane pad that was utilized in the construction of the 4th East tube conveyor has been in service for approximately one year. A decision by UP&LCO has been made to leave the crane pad in place, making it a permanent structure within the disturbed area, to serve as an additional storage area.

To include the crane pad in the Wilberg MRP may require some additional permitting; however, with the two and one-half year review of the Wilberg MRP coming up shortly we would request your permission to wait until that time to include the pad as a permanent structure.

We will await further guidance from you and your staff. Should you have any questions, please call.

Sincerely yours,

C. E. Shingleton  
Director of Property Management  
Mining Division
