Dear Mr. Holbrook:

The Forest Service has reviewed the Golden Eagle subsidence monitoring nesting plan submitted by Utah Power and Light Company for the Wilberg/Cottonwood Mines. If both the U.S. Fish and Wildlife Service and Utah Division of Wildlife Resources agree that the monitoring time will continue until subsidence representing 80 percent of the extracted seam height has occurred, or until such time that data demonstrates a conflict does not exist, our concern will be adequately addressed.

If a report discussing the survey and the results is prepared for this study, the Forest Service will require a copy.

Sincerely,

/s/ William H. Boley
