RE: Submittal of Annual Monitoring Reports for 1986 East Mountain
Hydrology and Subsidence

Dear Mr. Braxton:

Transmitted herein are 3 copies each of Utah Power & Light
Company's Annual East Mountain Hydrological and Subsidence
Monitoring reports. These reports include the permitted and
adjacent lands associated with the Deer Creek, Wilberg/Cottonwood,
and Des-Bee-Dove coal mines in Emery County, Utah. Reports include
monitoring to December 31, 1985.

Also, submitted, as per your letter of request dated
December 23, 1985, is an annual report form for each UP&L Co. mine
including one copy each of the most recent certificate of insurance
(renewal invoices) and one copy each of updated mine sequence maps
(updated workings).

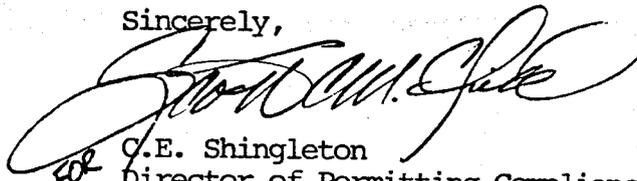

Interim revegetation activities have recently been implemented
on various disturbed areas at each mine site, utilizing the
approved interim seed mixtures as outlined within each MRP. A
majority of the re-seeding was conducted in 1985 and, therefore, no
significant monitoring data is available at this time.

In the interest of completeness, we feel it would be of
significant value if we could access the same type data from
operations adjacent to ours.

Mr. Lowell P. Braxton
