enclosed, the report contains a large amount of related information which may be useful to you.

Our plans for start-up of longwall mining in the 9th West section, located in this extended boundary, are projected for mid-January, 1988. We are hopeful that your agency can approve the modified permit prior to that date. If you need any additional information, please contact me by telephone at (801)687-9821.

Thank you for your assistance on the subject.

Sincerely,

Ray Christensen  
Manager, Permitting and Compliance
