Dear Mr. Braxton:

Re: 1987 3rd Quarter Engineering Inspection Reports  
Deer Creek and Cottonwood/Wilberg Mines  
ACT/015/018 and ACT/015/019

Transmitted herewith are the Certified Engineering Reports for the Waste  
Rock Sites of the above mentioned mines for the 3rd quarter of 1987.

Sincerely,

Ray Christensen  
Manager, Permitting & Compliance

DEER CREEK  
ACT/015/018  
WASTE ROCK DISPOSAL SITE  
ENGINEERING REPORT  
3RD QUARTER 1987

INTRODUCTION:

This report is required by UMC 817.71 (i) and our mine plan

The disposal area is an extension of the existing material storage, parking lot fill structure.

Material from the trommel screen, sediment and underground development waste are dumped at the site. As material accumulation dictates, compacted lifts of two feet maximum depth are made on the active fill surface. Any trash or extraneous materials is hand sorted at the time of compaction and placement.

OPERATION:

Active fill surface is at elevation 7427.35.

CERTIFICATION:

I do hereby certify that the Deer Creek waste rock site is being constructed according to sound engineering practice and regulations governing its construction and the approved M.R.P.

COTTONWOOD/WILBERG

ACT/015/019

WASTE ROCK DISPOSAL SITE

ENGINEERING REPORT

3RD QUARTER 1987

INTRODUCTION:

This report is required by UMC 817.71 (i) and our mine plan

The disposal area is located on an approved 16 acre right-of-way from the B.L.M. located approximately two miles from the Cottonwood/Wilberg Mine site. This site serves both the Cottonwood/Wilberg and the Des-Bee-Dove Mines.

OPERATION:

During the 3rd quarter, material from Cottonwood was placed in the facility. Trash and extraneous material was removed and spreading and compacting was completed.

CERTIFICATION:

I do hereby certify that the Cottonwood/Wilberg waste rock site is being constructed according to sound engineering practice, the regulations governing its construction and the approved M.R.P.
