Re: Guardrailing Installation at Cottonwood/Wilberg Mine Site

Dear Mr. Smith:

Please find this letter as notice that guardrailing has been installed at the Cottonwood/Wilberg Mine from the guard station to the permit boundary. This work action is the result of a MSHA requirement, requiring railing at elevated road locations within the mine permit.

An extension to the present facilities map is required to show the new guardrailing. A copy of this map will be sent to the Division upon completion of the revision with reclamation bonding calculations. Seven (7) copies will be submitted to the Division by November 15, 1989.

Sincerely,

David Smaldone
Director of Permitting,
Compliance and Services
