Re: Cottonwood/Wilberg Waste Rock Storage Facility

Dear Pam:

In the most recent information supplied to this Division concerning the above referenced project, it would appear that it will be necessary for Utah Power & Light Company to provide basic information concerning the sedimentation pond, as required under Form R-69. Because of the small size and hazard classification of this facility, prior approval is not required. However, completing this form will comply with the law.

I will contact Utah Power & Light Company Mining Division and request this information. I appreciate the opportunity to review these plans.

Sincerely,

Mark P. Page  
Area Engineer
