Dear Ms. Grubaugh-Littig:

Please find enclosed the Inspection Report for the critical construction period of topsoil and vegetation removal required during the construction of the Cottonwood/Wilberg Waste Rock Storage Facility. Please note that this report also covers the construction period of underdrains and protective filter systems.

Sincerely,

Guy Davis

**COTTONWOOD/WILBERG WASTE ROCK STORAGE FACILITY
INSPECTION REPORT**

Construction of the Waste Rock Storage Facility and the access road was begun on 12 June, 1990. All topsoil required for storage has been removed and stored in stockpiles. All organic material has been removed from the base of the road, pond, dam and the waste storage pile. There are no underdrains or protective filter systems planned for this facility.

This facility is being constructed according to the approved plan and Utah R614 Rules.

THOMAS J. FAUCHEUX
