February 8, 1990

Ms. Pamela Grubaugh-Littig
Permit Supervisor
Division of Oil, Gas and Mining
355 West North Temple
3 Triad Center, Suite 350
Salt Lake City, Utah 84180-1203

Dear Ms. Grubaugh-Littig:

Regarding: Review of Portals in Disturbed Area and Leach
Field Markers, Utah Power and Light Company,
Cottonwood/Wilberg Mine, ACT/015/019-89C,
Folder #2, Emery County, Utah

The concerns, discussed in your letter to Mr. Smaldone (January 9, 1990) and the Technical Memorandum attached thereto, have been addressed in the materials submitted January 15, 1990. The materials address Alternative Sediment Control Areas (ASCA's) at all Utah Power and Light Company mines including the Cottonwood/Wilberg facility.

Information regarding the portal area is presented on page 3-51.2 (DC 9th East Breakouts) and on Drawing WS449E, Packet 3-16.

Information regarding the leach field is also presented on page 3-51.2 (Sewer Absorption Field) and on Drawing CM-10370-WB, Packet 1-3.

The concerns regarding markers and sediment control at the leach field have been addressed on-site as indicated in Mr. Malencik's inspection memo dated January 4, 1990 (copy attached).

When approval of the ASCA information is received from the Division, the required copies will be submitted.

If you have questions concerning this matter please call me at 687-9821.

Sincerely,

Val Payne
Senior Environmental Engineer
