RE: Automated Security System, Utah Power and Light Company, Deer Creek Mine, ACT/015/018-90A, and Cottonwood/Wilberg Mine, ACT/015/019-90B, Folder #2, Emery County, Utah

## Synopsis and Proposal

### Deer Creek Mine

The automated security system at the Deer Creek Mine includes two gate/access installations (at the guard shack and the existing mine gate). The installation at the mine gate will include widening of the road and paving, which is all within a currently disturbed area. The text and surface facilities map and access road drawing have been revised. The reclamation cost is 0.2 percent of the bond. The bond will be re-estimated at permit renewal this year.

### Cottonwood/Wilberg Mine

The automated security gate at the Cottonwood/Wilberg Mine will also include two gate/access installations. The text and surface facilities map (Plate 3-16) have been revised. Reclamation costs are minimal.

### Recommendations

These amendments to the Deer Creek Mine and Cottonwood/Wilberg Mine should be approved.
