RE: **WASTE ROCK SAMPLING AMENDMENT, PACIFICORP, COTTONWOOD  
MINE, ACT/014/019-93B, EMERY COUNTY, UTAH**

#2

Dear Ms. Grubaugh-Littig:

I am enclosing the following revised pages (revised 5/4/93 and 3/4/93) which, when approved, will replace the pages of the same numbering in Volume 10 of the permit. An explanation of each page follows for better understanding of the proposed amendment.

**Pages 2-12.1 and 2-12.2 (revised 5/4/93)**

PacifiCorp proposes parameter reduction for the "operational" samples. Operational sampling/analysis will be followed for samples taken at the completion of each lift. "Reclamation" sampling/analysis will be followed for samples taken at the berm and the last two (2) lifts of site completion.

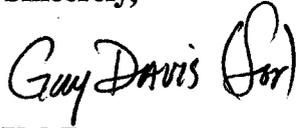

**Pages 2-13 (revised 3/4/93)**

PacifiCorp has noticed redundant sampling during the coal/rock ratio analysis. The same material is being analyzed for several quarters because of lack of material to make additional lifts. PacifiCorp proposes to reduce the quarterly coal/rock ratio sampling to annual sampling.

Upon approval, PacifiCorp will send additional copies of the revised pages.

If you have any questions, please call Guy Davis or myself at 653-2312.

Sincerely,

A handwritten signature in black ink that reads "Guy Davis Sr". The signature is written in a cursive style with a large, looped "G" and "D".
