Re: Cottonwood Waste Rock Site Soil Salvaging

ACT/015/019 #2

As requested by the Division, a revised copy of drawing CM-10816-WB has been attached. The drawing now includes a depiction of the location where soil will be salvaged from the slopes at the Cottonwood Waste Rock Site.

An approximate yardage of material that will be salvaged has also been calculated. It is expected that approximately 1300 cubic yards of material will be salvaged along the western and northern slopes of the Cottonwood Waste Rock Site.

If you have any questions please contact Amber Cox at 687-4822 or Chuck Semborski at 687-4720.

Sincerely,

Dennis Oakley
Environmental Engineer
