Cottonwood Mine

Cottonwood Fan Portals

Subject: Re: Case No. 93-1156

Well I confuse myself with let me see, 1055 cases the last three month and I am getting old, As I understand the Hauck report, the condition of the property, and the fact that the road has been updated and changed over, our office believes that the road no longer has integrity and would not be an eligible part of the historic mine, thus the no effect, if DOGM or Hauck disagrees, I would be glad to discuss. dykmann

Jim,

I am confused by your reply to Energy West Mining Company concerning the status of the road to the Old Johnson Mine site - 42EM1633 at the Cottonwood Mine.

The question is: Is the road considered part of the Johnson Mine site? If not, then the road to the portals of the mine will be backfilled and reclaimed. If it is considered a part of the "Old Johnson Mine Site" then access will be blocked and the road surface will be revegetated but not backfilled.

I'll fax you a copy of what I have to refresh your memory. Your response is appreciated.

Thanks, Susan
