Technical Analysis and Findings Utah Coal Regulatory Program

PID: C0150019
TaskID: 4760
Mine Name: COTTONWOOD/ WILBERG
Title: UPDATE VOLUME 10

General Contents

Reporting of Technical Data

Analysis:

Energy West Mining Company (the Permittee) resubmitted an amendment to update Volume 10 of the Cottonwood/Wilberg mine MRP to the Division of Oil, Gas and Mining (the Division) on December 11, 2014. This amendment to the MRP is processed in this findings report by the Division as Task ID #4760. Task ID #4760 is the Permittee's response to deficiencies found by the Division in a prior submission to update Volume 10 of the MRP, which was processed as Task ID #4718.

The Permittee's application, Task ID#4760, to update Volume 10 of the Cottonwood/Wilberg MRP has adequately corrected errors found in the prior Task ID#4718. In the prior application (Task ID #4718) a side-by-side comparison between the updated Volume 10 submittal against the approved Volume 10 MRP exposed multiple technical errors. These technical errors included mislabeled symbols, incorrect placement of decimals places, and/or missing parentheses. These technical errors have been corrected and the MRP now meets the clear and concise requirements.

Findings:

The resubmission of updated Volume 10, Task ID#4760, meets the minimum Clear and Concise requirements of rule R645-301-200.
