RE: Soil Survey Co-op Mining

Dear Mr. Hooper:

In checking our file copy of Co-op Mine Bear Creek soil map, I found no contour lines. Evidently, contour lines were added to the soil map after our field work.

To explain the confusion of the elevation markings, I call your attention to Hiawatha Quad, 1923, which is available to the general public. It appears someone mismarked the contour intervals. The Soil Conservation Service stands by our soil description location of 7,100 - 7,200 feet.

Any further questions should be directed to Co-op Mining.

Thank you.

Sincerely,

*Gary D. Moreau*
