RE: Determination of Completeness/
Technical Deficiency Document
Bear Creek Canyon Mine
ACT/015/025, Folder No. 2
Emery County, Utah

Dear Mr. Owen:

The Division's technical staff has completed its review of Co-op Mining Company's revised Mining and Reclamation Plan (MRP) for the Bear Creek Canyon Mine submitted October 26, 1983. Enclosed please find the Division's combined Determination of Completeness (DOC) and Technical Deficiency (TD) document for the subject mine plan. As you will note, the permit application remains incomplete.

The DOC portion of the review document addresses requirements pertaining to the UMC 700 regulations which have not been adequately addressed in Co-op Mining Company's revised MRP (October 26, 1983). The TD section of the review relates to the UMC 800 regulations and those concerns or deficiencies which must be addressed by Co-op Mining Company in order for the Division to proceed with the Technical Analysis (TA).

Items for which more information has been requested in previous review documents are so designated by asterisks.

Mr. Wendell Owen
ACT/015/025
March 27, 1984
Page 2

As a result of the continued incompleteness and deficiency of the MRP, the Division has scheduled a meeting with Co-op Mining Company, the Company's attorney, Division staff and the Division's Assistant Attorney General to discuss possible resolution of this on-going problem. This meeting will take place April 2, 1984 at 2:00 p.m., at the Division offices; all parties involved have been previously notified.

Should you have any questions regarding this document or the scheduled meeting, please contact Mary Boucek or Ev Hooper of my staff.

Sincerely,

for *Mary M. Boucek*
James W. Smith, Jr.
