The inspector's statement revealed that the sediment pond was enlarged. The top layer was stored at the temporary-approved storage area. The balance of the material was used to enlarge the shop pad. This resulted in altering a disturbed drainage channel, that is, filling it in and creating a new riprap channel. The enlargement is about 20 feet across and extended about 60 feet along the drainage ditch to the sediment pond. The enlargement of the sediment pond was approved by the Division.

In response to the inquiry relevant to the shop pad, Mr. Owen stated, in substance, that it had taken too long to submit and secure approval on new coal mine improvements, thus 25 points are assigned.
