DIVISION OF  
OIL GAS & MINING

Dear Pamela:

Re: Loadout Belt and Storage Pad expansion, Co-Op Mining Company, Bear Canyon Mine, [REDACTED] County, Utah

Attached are two copies of proposed Plates 2-4C (Rev.4), 7-1C (Rev 7) and 8-5C (Rev 3) dated 6-4-92. A proposed loadout conveyor tunnel has been added in line with the main conveyor from the tippel. Excavation of this tunnel will involve relocation of fill material. Co-Op proposes to move this material where it will be used to extend the edge of the storage pad near the south loadout conveyor. Extending the pad at this location will reduce the problem of coal falling down the slope and into ditch D-3D.

Also attached are two copies of proposed pages 3-86 and 3-88 dated 6/4/92. Bonding has been adjusted to include removal of the added loadout conveyor tunnel. All of the area involved in this change is within the disturbed area and no modification to drainage control structures will be required.

Please review the attached submittal and notify me of any questions or concerns. This proposed modification was made on approved maps bypassing recent submittals, as you suggested, in an effort to decrease approval time. Co-Op would appreciate your cooperation so this project can be completed. The copies of the proposed revised pages and plates have been marked "DRAFT" to differentiate them from those previously approved. Additional copies of these plates and pages will be forwarded to the Division upon receipt of written approval. This modification will be added to recent submittals upon approval.

Thank you,

Kimly C. Mangum, P.E.

Ms. Grubaugh-Littig,

Enclosed please find a proposal designed by Mangum Engineering Consultants for a PAP modification and/or violation abatement. Please review and notify Co-Op Mining Company upon approval of the attached proposal. Thank You.

Sincerely,
