Re: Third Quarter Water Monitoring Report, 1993, Co-Op Mining Company, Trail Canyon Mine, ACT/015/021, Bear Canyon Mine, ACT/015/025, Emery County, Utah #2

Due to a Laboratory mix-up, the analysis for DH-2, August, 1993, sample has not yet been completed, and will not be completed in time to submit the Water Monitoring Report by the end of October. See attached letter from CT&E Laboratory. Co-Op Mining Company requests an extension until November 8, 1993, to submit the Third Quarter Water Monitoring Report.

If you have any questions, please call Charles Reynolds at (801) 381-2450.

Thank You,

Wendell Owen

October 26, 1993

Dear Charles:

Due to a mix-up at CT&E, CT&E sample # 59-13483 (DH-2) has not yet been completely analyzed. Because of a temporary overload and in preparation of a state audit, this sample was sent to CT&E's Denver Lab for analyses. In transit, the sample leaked and the Huntington Lab was not notified. When the Huntington Branch contacted Denver about the analyses, and was notified of the spillage, Huntington began running the sample, but not in time to finish before the end of the month. We, therefore, request an additional week to finish the sample.

Respectfully,

Larry Stout
Branch Manager-Huntington
