2. SIGNS AND MARKERS

The permittee has reinstalled several disturbed area perimeter markers at the ball park and has repainted all of the markers.

4a. HYDROLOGIC BALANCE: DIVERSIONS

The following ditches were checked with regard to meeting the specifications outlined in the mining and reclamation plan; D-8D, D-5D, D-3D, D-7U, and D-6U. D-1U was also checked and it was determined that although this ditch appears to retain an adequate cross sectional area, a lot of rock debris from the cut bank has fallen into it. Mr. Reynolds indicated it would be cleaned as soon as machinery can be made available. The permittee has redefined many of the sites diversions recently.

4c. HYDROLOGIC BALANCE: OTHER SEDIMENT CONTROL MEASURES

The permittee has repaired the straw bales which constitute the sediment control measure for the "ball park" area topsoil pile.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas, and Mining.
