RE: CO-OP Mining Company - "Bear Canyon" Mine - Application for a Permit Revision,
Culvert Removal

Dear Sir or Madam:

This in response to the Utah Division of Oil, Gas, & Mining's (UT-DOGM) August 8, 2004, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Culvert Removal, has determined that it proposes to remove culvert C-37U from service by abandoning it in place, changes the top width and depth calculations for Ditch D-37U, updates the list of officers and directors, and updates Plate 2-4F to depict the location of a cap and powder magazine at the Bear Canyon mine, Utah State permit C/015/025.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does not meet the requirements of 30 CFR 746.18(d). Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval.

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Culvert Removal with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the August 8, 2004 request to the Bureau of Land Management and the U.S. Forest Service for their review and comment.

RECEIVED

AUG 17 2004

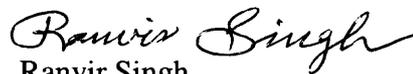

DIV. OF OIL, GAS & MINING

In an electronic transmittal dated August 11, 2004, the U.S. Forest service stated it had no comments regarding the application for a permit revision.

In an electronic submittal dated August 11, 2004, the Bureau of Land Management stated in its opinion the Application for a Permit Revision, Culvert Removal did not constitute a change that would warrant a mining plan modification.

Should you have any questions regarding this letter or approval, please contact Carl R. Johnston, Utah Federal Lands coordinator, at (303) 844-1400, extension 1500.

Sincerely,

A handwritten signature in cursive script that reads "Ranvir Singh".
