Subject: Missing Samples 2Q 2005

All:

Attached are the missing sample reports for 2Q 2005. Hiawatha and Bear sent upload notifications at 11:00 pm on 10/30 (as is becoming their habit). I think info should be in by close of business, but whatever you guys think I will accept.

Also Gary Gray sent in his notification for Genwal on Saturday — It is attached. Inspector, Hydro and Permit Supervisor can decide what to do.

Let me know if there are any questions.

Thanks,
Dana

Mine: 9 – Horse

As far as I can tell – I'm not sure what is Horse, what is Lila – not officially required yet. Dave may need to check this mine to be sure that nothing else is missing.
