Raptor mitigation plan meeting, Federal Coal Lease UTU-61049

Federal Coal Lease UTU-61049 Stipulation #6 requires the lessee to conduct an intensive field inventory for Threatened or Endangered (T& E) species of plants or animals along with any animals or migratory birds species of high Federal interest. The stipulation also requires that this is to be done with a qualified specialist and a report of the findings will need to be prepared. The plan will make recommendations for the protection of these species or action necessary to mitigate the disturbance.

BLM is requesting that you attend a meeting relating to this plan and report of findings. The meeting will be held at the US Fish and Wildlife Service office which is located at 2369 West Orton Circle, West Valley. The time will be 1:00 p.m. on Monday December 11, 2006.

We have invited representatives from all the Federal and State agencies. The contents of the stipulated plan and report of findings will be discussed in order to facilitate an understanding between the agencies and the company. Please bring all necessary information that may be relevant to the meeting such as mining, geology and subsidence maps, and any reports that may have been developed by the company relating to mining induced subsidence/escarpment failure.

If you have any questions regarding this request, please contact Steve Rigby (435)636-3604 or Jeff McKenzie (801)539-4038 of my staff.

Sincerely,

*for* /s/ Jeff McKenzie
