Subject: Fwd: FTP link for latest Bear Canyon Lease modification tech submittal

FYI,

Attached is a website link to an FTP site where we have placed the latest technical review response received from COOP for their latest Bear Canyon federal mine plan lease modification. Let me know if you have difficulty accessing same and I'll get our IT folks to assist. CD's of this submittal were forwarded earlier this week to the BLM and USFS offices per our normal mailing routes. A tentative date for OGM tech reviews to be completed on this submittal is July 7th.

We have also scheduled an onsite visit to field verify the accuracy of the vegetation, hydrology and associated maps on June 13 & 14 with COOP personnel. We have extended this invitation to BLM and USFS personnel to join us if their schedules will allow. Joe Helfrich from our office is coordinating this field trip. Please contact him directly at (801) 538-5290, with any questions or to confirm your attendance.

Thanks,

Wayne Hedberg
