Dale,

I can't tell you what to assume about the information Co-Op may have given you directly (perhaps call Mark to confirm?). All I know is that the hard copy of the MRP plan updates we received last Tuesday was not accurate or complete. The electronic disks that we received at the same time (and mailed to you and BLM) didn't match the hard copy and had info missing. Please disregard that CD when you receive it.

Co-Op took all the info back from us (except for the CD's we already mailed out) late Friday afternoon to correct same over the weekend. We received one corrected hard MRP copy (multiple 3 ring binders) this morning and several electronic CD's for distribution that are to reflect same. We will mail you, our PFO and the BLM an electronic copy this afternoon. I'll also have the older (incomplete) version from last week pulled off our web link and place the new one out there ASAP. If you need to have your own hard copy, I'd suggest calling Mark to see if he would drop one off to you.

Call me if you have further questions in this regard.  
 Thanks,  
 Wayne

Wayne:

I assume we should not be reviewing the paper copy Co-op gave us. When will we be getting a "final" copy to review, and when do we need to have our comments to you?

Dale

 Re: Bear Canyon Lease Addition -  
 Technical Deficiency Response

All problems that you have mentioned have been fixed and the documents have been resubmitted to DOGM at 8:30 this morning. Additionally, a staff member of C. W. Mining will be available to the Division all day to assist them if needed.

Mark Reynolds (PE)  
C. W. Mining Company
