**Subject:** Revised Processing Timeline - Bear Canyon Mine Lease Addition

Mark,

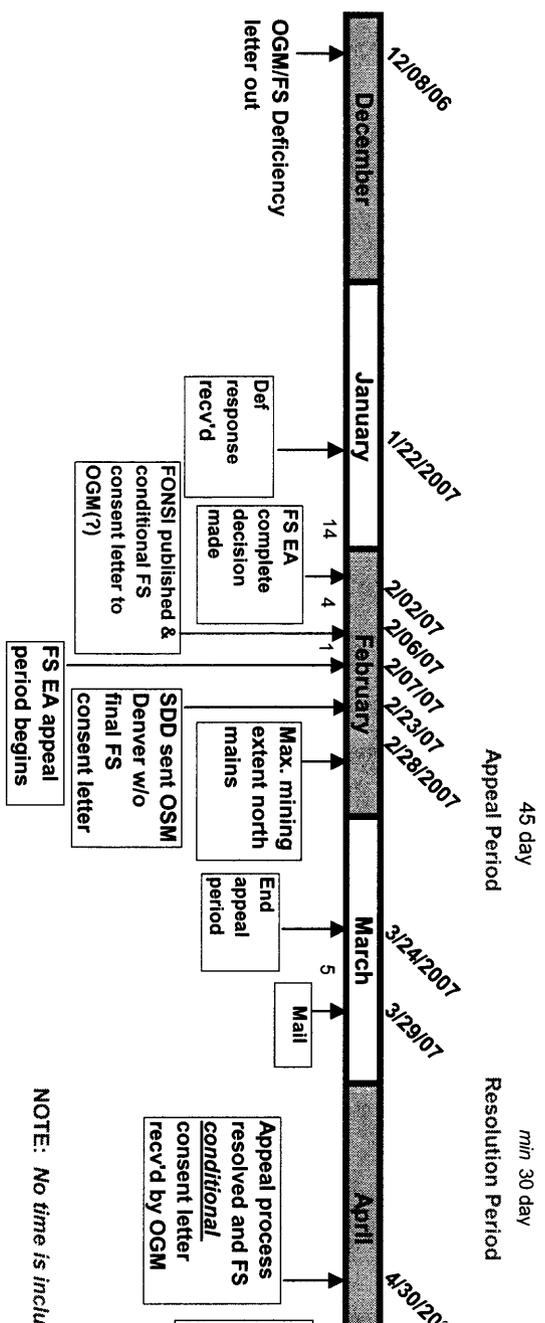

Attached is the latest draft copy of the revised timeline for the ongoing mine plan permit revision. These changes were made as a result of a conference call between BLM, USFS, OSM and OGM on 1/30/2007. This continues to assume a worst case scenario that an appeal will be filed in response to the USFS' forthcoming EA decision. We would like to discuss these latest projections with you at your earliest convenience. Joe and I will try and reach you later this morning after you've had a chance to look over the revisions.

You may need to print out the timeline on legal sized paper.

Thanks,  
Wayne Hedberg
