Subject: Dec 30 letter regarding 3rd Qtr monitoring
Place: OGMCOAL

Shawn and Lori,

I have entered the UPDES "no flow" information into the database. Just a reminder to include "no-flow", "dry well", and "no access" data as part of your submittal.
In cases like MW-114 and MW-117, make an entry with a note as to why there are no parameter values to report. (Similarly, as with the MH-2 baseline-data lab mix-up for the 2nd Qtr, make an explanatory comment part of the data submittal. Did the same thing happen at 16-8-8-10?)

According to Table 7-14, SBC-9A is to be sampled once per quarter, in Feb., May, Aug., and Oct.

According to Table 7-14B, baseline data are to be collected at SBC 16A until 3rd quarter 2010.

JIM

PS

The SBC-2 oil and grease entry for the 2nd Qtr has been deleted.
