Hi Jaren,

It seems that the maps required as part of your annual report (see below) have dropped through the cracks. We were expecting them about a month ago and have yet to see them. Hopefully you can get them submitted to us in short order? Thanks for your attention to this matter. Sincerely,

Daron R. Haddock
Coal Program Manager

If you could possibly give me to September 1st that would be good. The reason the length is because of the scheduling of a surveyer to help do the work. As well as we need to set new surface control. We cannot find COP's.

Thanks for your help.

That will be okay. How much more time to do you need? A couple of weeks?

Darron,

I was looking at my mail and realized that I needed to have turned in my subsidence map and projections map. I do have these to turn in but I was hoping to get a little more time because I am in the middle of a full check survey out of the mine. We believe that the underground does not match the surface. So we are doing a traverse from underground to the surface to link the two.

Could I get a little more time to complete this survey and get those maps to you more accurate?

I hope that we can work something out.

Thanks,

Jaren Jorgensen
