Hi Jaren,

I wanted to send you a note reminding you that there were a few springs that were approved for reactivation during the last permitting submittal (see September 26, 2012 letter). They are:

SBC-18
SBC-30
SBC-21
SBC-22
SCC-2

According to the sampling plan, these locations are required for field parameter collection during the months of May, August and October.

I just uploaded your 4th quarter 2012 data and these points were missing from upload. Operators have until the end of the following quarter to submit data to the Division (in this case, March 31st). Can you check your records to see if this data was collected from these springs in October? The amendment was approved towards the end of the 3rd quarter, which would mean that the changes would go into effect starting 4th quarter.

Thanks and feel free to call me if you would like to discuss this matter further.

April
