Jaren,

I've finally gotten around to looking at the bond sheets for the Phase III bond release of the Tank Seam Access Road and have a favor to ask. I'm having trouble tracking down the correct bond sheets for Bear Canyon within the Division's files.

Within the application you submitted an updated Total Sheet and Revegetation sheet that seem to be the most up to date. The problem I'm having is the Total sheet you have has a Demo and Earthwork subtotals that don't match up with the MRP and what that I have in the Division. I believe that the Division files are outdated and for whatever reason the updated sheets were not placed in the correct file.

Would it be possible for you to send me all of Bear Canyon's bond sheets in entirety so that I can track down where the Bond sheet's on the Division's end became outdated?

Thanks Jaren and let me know if you have an questions or concerns,

Cheryl Parker, M.S., P.E.
