Hello Alan,

We received the official copy of the TDN today. We feel that an important part of our response will be to visit the Bear Canyon Site. Essential members of our team are unavailable to do so until April 5. If possible, we would like to request an extension to respond to the TDN until 10 days after that, which would be April 15. If available, we would welcome anyone from OSM, especially Mr. Shumate to collaborate at the inspection. We understand if that is not possible due to travel and scheduling.

Thank you for your consideration,
Dana
