1. Permits, Change, Transfer, Renewal, Sale

The parking lot expansion task # 4650 that was approved 12/15/2014 has been postponed until site conditions are favorable in 2018. In the meantime it is suggested that the permittee submit a minor amendment that includes a description of the topsoil removal and storage area (ball park) for the parking lot expansion.

3. Topsoil

The as-built soils map for the conveyor belt area has been submitted to the Division.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

To date sediment pond A was being cleaned, pond B was previously cleaned this past fall, pond C does not need to be cleaned and pond D will be cleaned when the material starts to freeze up to a point where it can be removed from the pond.

7. Coal Mine Waste, Refuse Piles, Impoundments

There are two options for permitting a wasterock site at or near the mine. One is the ball park area that preliminary plans are in the works for and the other is the existing waste rock site for the Deer Creek mine. Both are pending at this time.

8. Noncoal Waste

The yard at the #3 portal was very clean and organized, the dumpsters were either empty or contained very little trash. The past several inspections have noted that non-coal waste management at the mine has shown considerable improvement.

18. Support Facilities, Utility Installations

There is one section of the conveyor that is suspended on cables rather than supported by towers, as such this section requires almost constant maintenance to terms of adjusting the cables to keep the coal from spilling off the belt line. For the past two years the mine management have committed time and resources to keeping the the previous coal spilages cleaned up and maintaining the conveyor belt system.
