Memorandum

OCT 16 1985

To: Center Administrator
Office of Surface Mining

From: ACTING District Manager, Moab

Subject: Genwal's Request for Partial Approval to Mine Ten Acres Within the Tract 2 Permit Application Package Area

A meeting was held in our Utah State Office on October 15, 1985, with Mr. Andrew King, representing Genwal Coal Company. Mr. King has arranged with DOGM for an interim approval to mine ten acres in the Tract 2 part of the Crandall Canyon mine pending the full permit application package (PAP) approval. Mr. King presented a map showing the area of the ten acres requested (partial copy enclosed). We have discussed the proposal and find it to be a natural sequence of mining for the development of the coal resource in Tract 2.

We have no objection to Genwal advancing coal development into the Tract 2 area and we recommend that Genwal be allowed to mine the ten acre area as requested. Mr. Boyd McKean of the Utah State Office and Mr. Allen Vance of our Price River Resource Area office concur with this recommendation. If you have any questions please contact Mr. Vance in our Price Office (801) 637-4584.

/S/ Brent Northrup
