In Reply Please Refer To Case No. H407

Dear Mr. Braxton:

The Utah Preservation Office has received for consideration the above referenced project. After review of cultural resource management material, our office noticed in the report that site 42EM722 is scheduled for mitigation. The mitigation outlined in the project appears to meet the standards set by the Advisory Council on Historic Preservation and the Office of Surface Mining. We would concur with the determination of no adverse effect if mitigation plans are followed as outlined, that meet Advisory Council standards.

The above is provided on request as assistance as outlined by 36 CFR 800.5. We make no regulatory requirement concerning the 1966 Historic Preservation Act, since that responsibility rests with the federal agency official, in consultation with the Advisory Council on Historic Preservation. However, if you have questions or need additional assistance, please let us know. Contact Jim Dykman at 533-7039.

Sincerely,

Wilson G. Martin
Acting State Historic
Preservation Officer
