DIVISION OF  
OIL, GAS & MINING

RE: Permit # ACT 015-032  
Genwal Coal Company  
Replacing Generator Shed With Outside Shop

Dear Mr. Summers:

With the addition of the new substation and the recent ability to use line power provided by our new transmission lines, we are no longer using the diesel generator for power at our mine site. Because of this recent event, we are no longer in need of the old generator shed (labeled 2 on the new surface facilities map), or the generator (labeled 1).

Genwal Coal Company hereby request approval from the Division to replace the generator shed with that of a 40' x 80' metal structure that will be utilized as an outside shop/storage building. There will be no disturbance of either drainage or vegetation associated with this request.

At this time we are actively seeking bids from several reputable dealers in metal buildings for our application, and when we have selected a building, a copy of these building plans will be submitted to the Division.

Enclosed please find a drawing that indicates where this building will be located in the permit area. As stated, this building will replace the generator and the generator shed that are no longer needed.

We are trying to proceed with this project as quickly as possible to complete it during this construction season. Your prompt and timely reply on this matter would be greatly appreciated.
