Re: Transfer of Crandall Canyon Mine to Genwal Resources, Inc., Folder #3,
ACT/015/032-95A, Emery County, Utah

The technical review of the application to transfer the Crandall Canyon Permit to Genwal Resources, Inc. has been completed. The application has been found to be complete and accurate and can be approved. An AVS system check was done on all entities involved with a result of an issue recommendation for all. An OSM recommendation was not requested and should perhaps be done before giving formal approval to the applicant. A bond will also need to be posted in behalf of the applicant (Genwal Resources, Inc.) before the permit can actually be transferred.

At this time the applicant is required to submit the appropriate number of copies of the revised pages of the Permit Application Package for distribution.

On the Division's part, one correction needs to be made to the legal description of the permit area. This involves including as part of the permit area the portion of the N1/2NW1/4SW1/4 of Section 5, Township 16 South, Range 7 East north of Crandall Creek. There is no change to the actual permit area since this area has been considered part of the permit area, but for some reason it was inadvertently left off of the past legal description. Correcting the legal description will merely bring it in line with the actual permit area.

WRITTEN FINDINGS FOR PERMIT APPLICATION APPROVAL

YES, NO or N/A

1. The application is complete and accurate and the applicant has complied with all the requirements of the State Program.	Yes
2. The proposed permit area is not within an area under study or administrative proceedings under a petition, filed pursuant to R645-103-400 or 30 CFR 769, to have an area designated as unsuitable for coal mining and reclamation operations, unless: A. The applicant has demonstrated that before January 4, 1977, substantial legal and financial commitments were made in relation to the operation covered by the permit application, or B. The applicant has demonstrated that the proposed permit area is not within an area designated as unsuitable for mining pursuant to R645-103-300 and R645-103-400 or 30 CFR 769 or subject to the prohibitions or limitations of R645-103-230.	Yes
	Yes
	Yes
3. For coal mining and reclamation operations where the private mineral estate to be mined has been severed from the private surface estate, the applicant has submitted to the Division the documentation required under R645-301-114.200.	Yes
4. The Division has made an assessment of the probable cumulative impacts of all anticipated coal mining and reclamation operations on the hydrologic balance in the cumulative impact area and has determined that the proposed operation has been designed to prevent material damage to the hydrologic balance outside the permit area.	Yes
5. The operation would not affect the continued existence of endangered or threatened species or result in destruction or adverse modification of their critical habitats, as determined under the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).	Yes
6. The Division has taken into account the effect of the proposed permitting action on properties listed on and eligible for listing on the National Register of Historic Places. This finding may be supported in part by inclusion of appropriate permit conditions or changes in the operation plan protecting historic resources, or a documented decision that the Division has determined that no additional protection measures are necessary.	Yes
7. The Applicant has demonstrated that reclamation as required by the State Program can be accomplished according to information given in the permit application.	Yes
8. The Applicant has demonstrated that any existing structure will comply with the applicable performance standards of R645-301 and R645-302.	Yes
9. The Applicant has paid all reclamation fees from previous and existing coal mining and reclamation operations as required by 30 CFR Part 870.	Yes
10. The Applicant has satisfied the applicable requirements of R645-302.	NA
11. The Applicant has, if applicable, satisfied the requirements for approval of a long-term, intensive agricultural postmining land use, in accordance with the requirements of R645-301-353.400.	NA
