Wanted to let you Jean received a copy of my Rowley Memo this morning. I called her to see if she had any concerns with it and to inform her of the recharge scenarios we discussed at the meeting in Castle Dale. She mentioned that they have Dr. Mayo working on the PHC for the new lease track. She thought we should be informed of his findings and will contact him to see if he will give us presentation. I told her to let Daron know so he could arrange for the hydrologists who have worked on the site and area to attend.

Jean wanted to know if they should submit an amendment to the PHC relatively soon or wait until they submitted it with the lease amendment proposal. I told her, considering the concerns of the water users they should consider submitting the amended PHC asap.
