ACT/015/032*

An informal conference covering appeals to the renewal of the above-cited permit was held on May 8, 1998. No specific, factual information supporting denial appear to have been presented. I will be preparing findings of fact for this hearing after I have had a chance to review the transcript, and wish to reserve final judgement on this issue until that time.

To avoid an administratively-delayed permit renewal, please consider issuing a conditioned renewal, with the conditions addressing renewal contingent upon no findings from to days informal conference to the contrary, and with conditions that notes that the inconsistencies noted by OGM and others- in the PHC and CHIA are to be addressed. (I believe you had language in mind for this.)

Thanks, Lowell
